

**AMENDMENTS TO THE ABSTRACT**

Please amend the Abstract as follows:

In order to transmit information relating to vehicle or vehicle component testing or monitoring at a test site, the test information is processed for example in a computer memory [[(19)]] and the resulting image signal is sent via a transmission medium [[(26)]] to a remote terminal [[(22)]] where it is reconstructed. As a result only the image signal is sent requiring reduced bandwidth.
